

JSX Air

JSX Air was founded in 2016 as JetSuiteX, a public charter airline based in Dallas, Texas. The carrier was rebranded as JSX Air in 2019 and flies occasional charter flights through the Albuquerque Sunport. JSX began regularly scheduled seasonal service to Taos, New Mexico on December 15, 2022 operating on behalf of Taos Air with flights to Austin and Dallas (Love Field), Texas as well as to Burbank and San Diego, California using 30-seat Embraer-135 and Embraer-145 regional jets. The winter service operates from mid-December through the beginning of April each year and the summer service operates from late June through late September each year. Beginning with the 2023/2024 winter season, flights to Austin operated through the Austin Executive Airport and flights to the San Diego area operated through the Carlsbad, California airport. During the summer of 2024, only the route to Dallas is operating plus new flights to the Denver area via the Rocky Mountain Metropolitan Airport near Boulder, Colorado on three days per week. The Denver flights are planned to operate year-round and new service to Las Vegas, Nevada is planned to operate through the fall from October 4 through December 8, 2024 on two days per week. The Dallas flights are planned to resume on December 9, 2024 for the winter ski season.

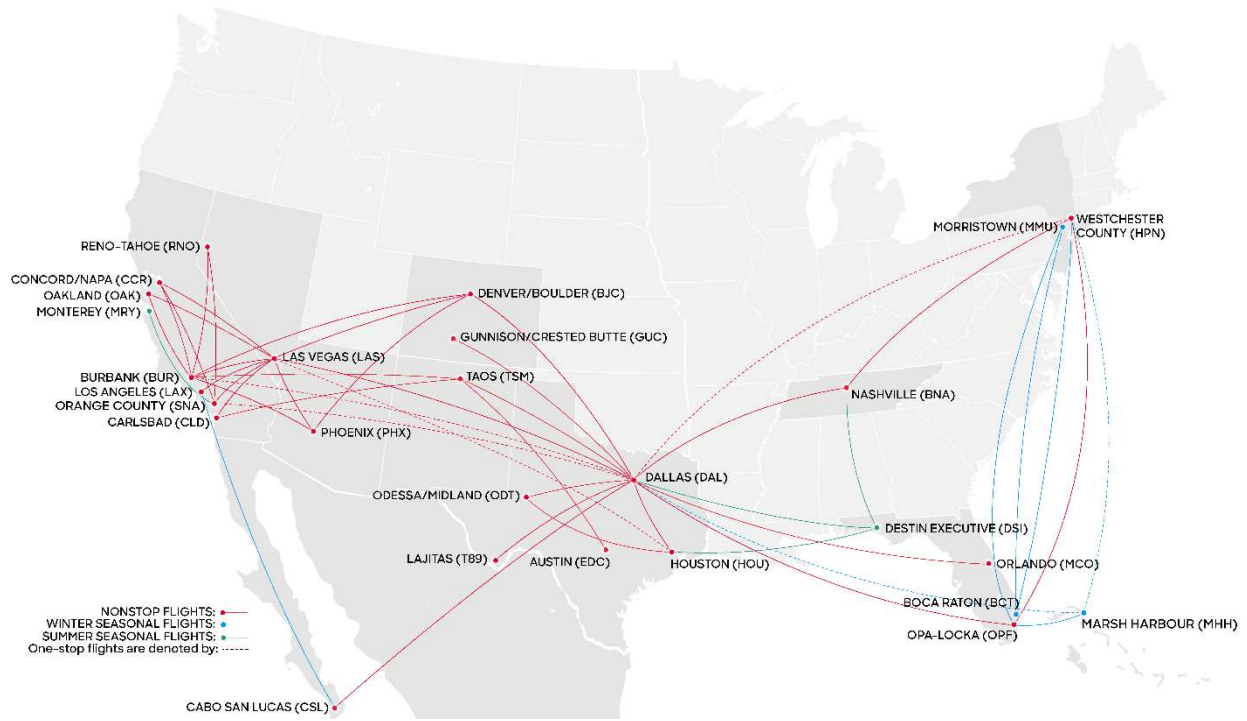

JSX is a subsidiary of Delux Public Charter LLC and is partially owned by JetBlue Airways. Scheduled JSX flights, including those serving Taos, also operate using a code-share with JetBlue.
